

Assignment: 6 (10.3.2026)

The data in this database is from the IMDB website:

- *Movies* (*movie_id*, *title*, *industry*, *release_year*, *imdb_rating*, *genre*, *language_id*)
 - *Financial* (*movie_id*, *budget*, *revenue*)
 - *Actors* (*actor_id*, *name*, *birth_year*)
 - *Movie_actor* (*movie_id*, *actor_id*)
 - *Languages* (*language_id*, *name*)
-

Execute the following queries:

1. Find the actors who are over 40 years of age whose movies have had a rating between 7 to 9.
2. For every actor, list the films he/she appeared in their debut year. Sort the results by last name of the actor.
3. Write a SQL query to list the names of all actors who starred in a movie in which Sanjay Dutta also starred.
4. Select all Hollywood movies released after the year 2000 that made more than 500 million \$ profit?
5. For each bucket, compute a field which is the Average profit and the Number of Movies in each bucket. Order the buckets in increasing size. Return the exact result.
6. How do the average ages of leading actors compare in each language type?
7. Select Hindi movies as per avg rating and classify them in the following category:

Rating > 8: Superhit movies

Rating between 7 and 8: Hit movies

Rating between 5 and 7: One-time-watch movies

Rating < 5: Flop movies

8. Find out the top five actors in Hindi movies released in India based on their average ratings?
9. Of the movies released between 1 April 2018 and 1 April 2019, how many movies of different languages were given a rating of 8?
10. Which combination of actors are getting good IMDB_Rating maximum time?
11. Which combination of actors are getting good revenue?
12. Show year wise average rating per genre.
